

FUTURE SCIENTISTS FOR THE ENVIRONMENT SECTOR

BUILDING RESEARCH PARTNERSHIPS FOR BUSINESS AND POLICY

Meadow Suite, Park House, University of Reading RG6 6UA
July 11, 2017 • 1.30pm – 5pm

Reserve your place online at: rdg.ac/sci4future

Find out how your organisation can benefit from research collaboration with the University of Reading. We are one of the UK's leading institutions on environmental research, advancing modelling, quantitative and technical expertise in the following fields:

- Evolution and biodiversity conservation
- Climate, weather and environmental risk
- Data assimilation and remote sensing.

We work in close partnership with Imperial College London, University of Surrey and a range of non-academic partners, including the Centre for Ecology and Hydrology, CEFAS, the Met Office and the Zoological Society of London on a range of practical applications.

Meet with leading scientists to discuss your ideas for possible projects and listen to leaders from the environmental sector about their experiences of government-funded doctoral research and the practicalities of getting involved.
